

No. 4 (1982)

Erschienen im Dezember – Published in December

Bulnheim, H.-P.: In memoriam Friedrich Krüger (1902–1982)	401–403
Krüger, F.: Zur mathematischen Simulation tierischer Wachstumskurven. [On the mathematical simulation of growth curves of animals]	405–407
Riesen, W. & Reise, K.: Macrobenthos of the subtidal Wadden Sea: revisited after 55 years	409–423
Watermann, B., Dethlefsen, V. & Hoppenheit, M.: Epidemiology of pseudobranchial tumours in Atlantic cod (<i>Gadus morhua</i>) from the North Sea and the Baltic Sea	425–437
Dawirs, R. R.: Methodical aspects of rearing decapod larvae, <i>Pagurus bernhardus</i> (Paguridae) and <i>Carcinus maenas</i> (Portunidae)	439–464
Richter, S.: Zur Ultrastruktur der seitlichen Sinnesorgane am Augenhügel von <i>Anoplodactylus pygmaeus</i> (Pycnogonida). [Ultrastructure of the lateral sense organs on the ocular tubercle of <i>Anoplodactylus pygmaeus</i> (Pycnogonida)]	465–478
Westheide, W.: Ultrastructure of the genital organs in interstitial polychaetes. III. Penes and ejaculatory ducts in <i>Hesionides arenaria</i> (Hesionidae)	479–488
Healy, J. M.: Ultrastructure of paraspermatozoa, euspermatozoa and eusperm-like spermatozoa of <i>Obtortio</i> cf. <i>fulva</i> (Prosobranchia: Cerithiacea)	489–500
Drebes, G. & Schnepf, E.: Phagotrophy and development of <i>Paulsenella</i> cf. <i>chaetoce-ratis</i> (Dinophyta), an ectoparasite of the diatom <i>Streptotheca thamesis</i>	501–514
Grave, H. & Möller, H.: Quantifizierung des pflanzlichen Strandanwurfs an der westdeutschen Ostseeküste. [Quantification of dead marine plant biomass along the Baltic Sea coast of Western Germany]	517–519
Buchbesprechungen [Book reviews]	521–537

Corrigendum

Re.: Helgoländer Meeresunters. 35, 425–437, 1983. (Waterman et al.)

- (1) Fig. 1, legend: symbol for stations with low number of cod should read ●.
- (2) Second sentence on p. 429 must be inserted on p. 431 as fourth sentence.
- (3) Figs 6 and 10, legends must read: 'Infestation rate. Percentages of cod

Corrigendum

Re.: Healy, J. M. Ultrastructure of paraspermatozoa, euspermatozoa and eusperm-like spermatozoa of *Obtortio* cf. *fulva* (Prosobranchia: Cerithiacea). Helgoländer Meeresunters. 35, 489–500 (1982).

In the final printing, shells of *Obtortio* (Fig. 27, p. 498) were printed in reverse giving the erroneous impression that shells of this species are sinistrally coiled. The shell of *Obtortio* is dextrally coiled.
