

*Corrigendum*

In the paper by J. J. Manzi & M. B. Maddox: "Algal supplement enhancement of static and recirculating system culture of *Macrobrachium rosenbergii* larvae" which has been published in *Helgoländer wiss. Meeresunters.* 20, 447–455 (1976), the fourth sentence on p. 452 must be correctly read as follows:

Subsequently, survival in the control cultures decreased precipitously and by the end of the experiment (day 34) the mean control treatment survival (50.9 %) was appreciably lower than survival in either the static algal supplemented treatment (75.5 %) or the recirculated algal supplemented treatment (82.7 %).
